

URGENT Action for 3rd year students moving into TY or 5th year:

From the beginning of the next academic year, it is a requirement that any iPad being used by a student in Creagh College will need to have an up-to-date management system installed. All existing 3rd year students currently have this software installed but the license for this is due to expire. It is vital that Parents log on to www.wriggle.ie and renew/extend this license for another 2 or 3 years depending on whether the student is entering TY or 5th year. There is no flexibility in relation to the requirement for a fully managed iPad here in Creagh College.

Deadline for completion June 30th

To renew and extend this license please complete the following steps:

- Go to www.wriggle.ie
- Choose **Order** from right hand side of the top menu.
- Input the school store code of **80440**.
- Navigate to either the 4th year or 5th year store depending on which year you will be in next year.
- Select the **continue using my existing device** option.
- You must also choose BYOC as in bring your own case
- Continue by clicking proceed to next steps.
 - You will reach a section called **Wriggle Services Options**
 - You need both options from here - **Mobile Device Management** and **Digital Technology Training Support**
 - The fee will either be €99 or €66 depending which year you are going in to.
- Proceed to the checkout stage.
- Please note no other additional service need to be purchased.
- Please enter your details and your device should then be automatically up to date.
- *There is a deadline of June 3rd for this to be completed by. Failure to do so before this deadline will result in the iPad needing to be physically sent back to Wriggle at a potentially greater cost.*
